

# Application

Champion 4000® meets and exceeds warranty requirements for all major OEM equipment, including those listed below.

- AGCO (Deutz-Allis)
- Allison
- API
- Caterpillar
- Dennison (Pump only)
- Ford-New Holland
- Fiat-Hesston
- I.H.C.
- J.I. Case/Case International
- John Deere
- Komatsu Dresser
- Kubota
- Massey Ferguson
- Oliver
- Renk Doromat
- Sperry Vickers/Eaton
- Steiger
- Sauer Sunstrand/Danfoss
- Versatile
- Volvo
- White
- ZF-Transmissions

## Keeping Farmers in the Field

Since 1956, Champion has been a trusted brand name in high-quality lubricants. Champion Brands has earned recognition for being a leading manufacturer of innovative, high-quality and durable lubricants, chemicals and related products. Call our friendly sales representatives for more information.

# When You Need Rock Solid Performance in Your Hydraulics

## Champion 4000® UTHF Delivers

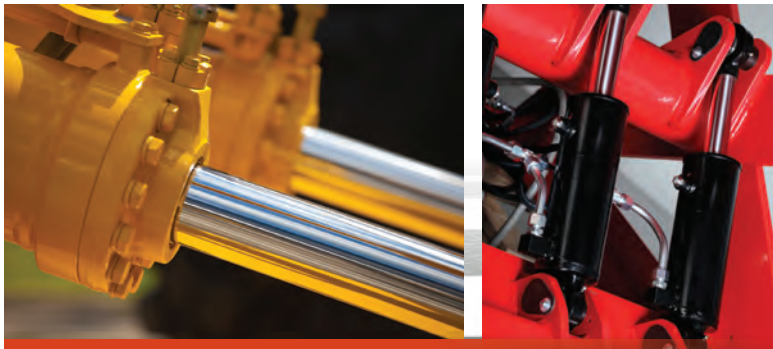

# Delivers exceptional performance in today's power train transmissions, axles, clutches, PTOs & hydraulic systems.

## Champion 4000® Premium Universal Tractor Hydraulic Fluid

Champion 4000® Premium Universal Tractor Hydraulic Fluid is our premium quality, hydraulic fluid specially formulated to keep farm tractors, logging equipment and construction machinery in top form. It delivers exceptional performance in today's power train transmissions, drive axles, clutches, PTOs and hydraulic systems.

Champion 4000® is intended for use in transmissions where hydraulics, gearsets, final drives, clutches and wet brakes all use the same fluid. Use it in:

- 4X4 ATVs
- Agricultural Implements
- Backhoes
- Bulldozers
- Ditchers
- Farm Tractors
- Forklift Trucks
- Front-End Loaders
- Lawn Tractors
- Loaders
- Mining Equipment
- Pavement Rollers
- Road Graders
- Tractors

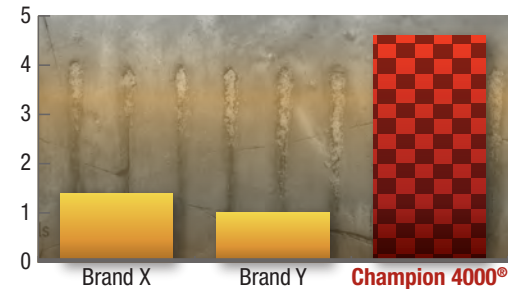

### Proven Performance

Champion 4000® is manufactured from high-quality paraffinic base oils, selected for their purity and thermal stability. The formulation includes a premium additive package to provide anti-wear protection, proper friction control and oxidation resistance. Champion 4000® is engineered to prevent brake chatter and is suitable for year-round use in extreme hot and cold temperature ranges. It meets the SAE viscosity grade of 10W-30, API Service Classification SF/CC and API GL-4.

In performance testing, Champion 4000® Premium Universal Tractor Hydraulic Fluid displayed the following comparative performance capabilities:

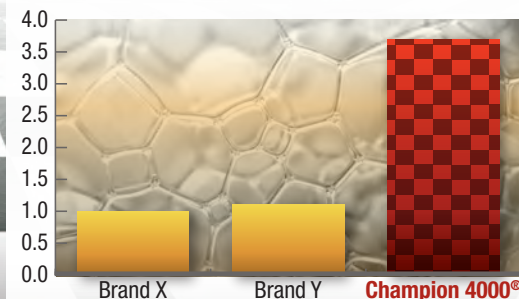

### Wear and Oxidation Protection

Oxidation instigates sludge deposit formation. Champion 4000® can fight oxidation and premature wear at more than twice the rate as Brands X and Y.

### Detergency

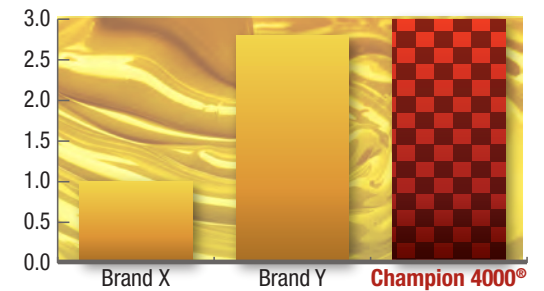

Tractor fluid detergents neutralize corrosive combustion acids that might otherwise dissolve key metal parts and ultimately lead to component failure. The high level of detergent additive in Champion 4000® keeps combustion byproducts in suspension so harmful deposits do not form.

Champion was one of the first to develop and market Universal Tractor Hydraulic Fluid, beginning in the mid 1960s.

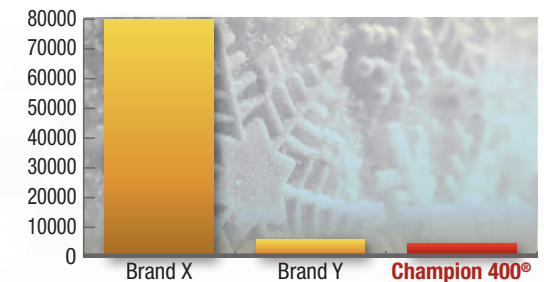

### Viscosity Control

Champion 4000® is engineered to better maintain viscosity control between oil drains.

### Cold Temperature Performance

The viscosity of any tractor fluid increases as outdoor temperatures get colder. At -4°F, Champion 4000® is 17 times less viscous than Brand Y and 1.3 times less viscous than Brand X.

Brands X and Y may cause damage and void new tractor warranties.
